ABOUT ME

I am a graduate of the Computer Programming program at İzmir University of Economics. I see software development not as something to memorize, but as a field whose underlying logic should be understood. When I encounter problems, I enjoy researching, experimenting, and producing different solutions. Throughout my education, projects, and internship experiences, I have focused on improving myself by putting what I learn into practice.

WORK EXPERIENCE

Software Development Intern | NISO Software Technologies Inc.

20.07.2026 - 11.09.2026

- Worked on development, debugging, and business rule updates in the existing JavaScript codebase of the OfficeDaysManagement application.
- Worked on conditions, validations, and day-assignment logic for planning office, remote-work, and leave days.
- Contributed to converting employee/leave data from Excel into JSON, processing and validating the data, and maintaining data refresh flows.
- Actively used Git and GitHub for branching, commits, and pushing changes to remote repositories.

Technical Service Intern | BDH IT Support Services Inc.

09.2023 - 06.2024

- Worked on device fault diagnosis, maintenance, and technical service operations within HP Authorized Service processes.
- Performed hardware disassembly, component repair/replacement, post-repair testing, and functionality checks.

Accounting Intern | Çağdaş Vizyon Muhasebe

04.2023 - 09.2023

PROJECTS

OfficeDaysManagement - Internship Project | JavaScript, Excel/JSON, Git, GitHub

- Worked on day-assignment rules, validations, and bug fixes in a weekly office, remote-work, and leave-planning application.
- Contributed to converting Excel data to JSON, processing employee/leave information, and organizing data flows.

Time Wallet | PHP, MySQL, HTML, CSS, JavaScript

- Developed a web application that enables service exchanges using time credits, with registration/login, password reset, service add/delete/list, and exchange workflows.
- Managed database operations for users, services, and exchanges using PHP PDO and MySQL.

Sky Pass | Python, Tkinter, MySQL

- Developed an application with a desktop interface using Python and Tkinter, MySQL connectivity, and basic data insertion, display, and management operations.

EKOFIT Gym Management System | Java, MySQL, JDBC

- Developed features in a Java console application including member registration/login, calorie calculation, workout recommendations based on calorie values, and randomly generated weekly exercise plans.
- Connected the application to MySQL using JDBC and performed INSERT, SELECT, and UPDATE operations for user authentication and calorie data.

PROGRAMMING LANGUAGES AND TECHNICAL SKILLS

Programming / Web: JavaScript, PHP, Python, HTML, CSS, Java, C#

Database: MySQL, MSSQL / Microsoft SQL Server

Version Control: Git, GitHub

COMPUTER SKILLS

Development Tools: Visual Studio Code, IntelliJ IDEA, PyCharm, WebStorm, SQL Server Management Studio

Other Software: MS Office, Adobe Dreamweaver, Adobe Photoshop, Adobe Animate

EDUCATION

Computer Programming | İzmir University of Economics

2024 - 2026

Computer Programming | Küçükyalı Vocational and Technical Anatolian High School

2019 - 2023

LANGUAGES

English: B1

CERTIFICATES

Global Kariyer: Web Design
